— THE FOUNDER

Rao Umer

2018
TRADING
SINCE

RTC
FOUNDER

5
DISCIPLINES

Trading forex and gold since 2018, and the creator of a system built to make traders think like institutions.

Rao Umer is a forex and gold trader and the founder of **RTC, Rao Trading Concept**: a complete trading methodology built from hands-on market experience since 2018.

RTC came from a simple observation. Most retail traders do not lose because they lack indicators. They lose because they read the market from the wrong side of the table. RTC closes that gap with one rule-based framework that reads volume, structure and liquidity the way institutions do.

Through the RTC Mentorship, he teaches traders to move away from indicators and guesswork, toward a disciplined, structure-first approach. Classes are taught in Urdu and Hindi.

— WHAT IS RTC

A system, *not a strategy*

RTC (Rao Trading Concept) is a comprehensive trading methodology developed by Rao Umer from hands-on market experience since 2018.

It is not just another trading strategy. It is a complete system and mindset that helps traders think and operate like institutions rather than retail participants.

THE RTC PHILOSOPHY

*Trade with institutional logic, not guesswork. Avoid common retail traps and fake breakouts. Understand **why** price moves, not just where.*

— WHAT MAKES RTC DIFFERENT • FIVE DISCIPLINES, VSA-LED

01 • PRIMARY

VSA

The confirmation lens for every entry: real pressure or a manipulated move.

02 • 03

ICT + SMC

Structure, liquidity and institutional footprints across the chart.

04 • 05

Wyckoff + PA

Accumulation and distribution phases, and raw candle behaviour.

— THE FIVE PILLARS

One lens, *four supports*

RTC is anchored in Volume Spread Analysis. Every setup is filtered through real buying and selling pressure before structure or footprints are trusted. Four supporting disciplines sharpen the read.

MOST WEIGHTED DISCIPLINE • PRIMARY LENS

VSA

VOLUME SPREAD ANALYSIS

01

VSA is the confirmation layer RTC leans on the most. By reading the relationship between price spread and volume, it shows whether a move is backed by genuine institutional buying or selling, or whether it is a manipulated, low-volume fake-out built to trap retail traders.

Structure and footprints tell you where to look. VSA tells you whether to believe what you are seeing.

— SUPPORTING DISCIPLINES • 02 TO 05

ICT

INNER CIRCLE TRADER

02

Reads market structure, liquidity pools and the true intention behind price moves: how smart money traps retail.

SMC

SMART MONEY CONCEPTS

03

Identifies institutional footprints: order blocks, mitigation blocks and manipulation patterns.

Wyckoff

ACCUMULATION & DISTRIBUTION

04

Reads market phases, where institutions quietly accumulate or distribute before the real move begins.

Price Action

RAW CANDLE BEHAVIOUR

05

Strips away every indicator to read candles, swing structure and momentum without lag.

— CORE FOCUS & PHILOSOPHY

What RTC *trains you to do*

CORE FOCUS OF RTC

- ✓ Understand market psychology and how emotion drives retail behaviour
- ✓ Identify liquidity grabs and manipulation zones
- ✓ Take high-probability entries from the confluence of structure, liquidity and volume
- ✓ Practise strict risk management to protect capital
- ✓ Build consistency through rule-based decisions
- ✓ Replace emotional decisions with logic and structure

WHY RTC IS MORE THAN A STRATEGY

- Trade with institutional logic, not guesswork
- Avoid common retail traps and fake breakouts
- A disciplined mindset that runs on data, not hope
- Spot smart money footprints in gold, forex, indices and crypto
- Understand why price moves, not just where

Reprogramming how you *see the chart.*

— WHO RTC IS BUILT FOR

Is RTC *right for you?*

RTC is for traders who are ready to move beyond indicators and signals, and start trading with structure, logic and discipline. The course starts from the foundations, so a committed beginner can follow it from day one.

TRADER PROFILE

01

Traders tired of unreliable indicators and signals, looking for a framework built on structure rather than noise.

TRADER PROFILE

02

Those who want to move from retail to institutional-style trading, and think the way smart money does.

TRADER PROFILE

03

Beginners who want a structured path from the first lesson, and intermediate traders who want a logical edge.

TRADER PROFILE

04

Anyone committed to mastering trading psychology, risk management and precise, rule-based execution.

The *standard*

RTC trains you to spot smart money footprints in all market conditions, and to build a trading identity around data, not hope.

— MENTORSHIP CURRICULUM

Inside the RTC *Mentorship*

A structured, step-by-step curriculum that takes you from confused to confident. Ten modules. One complete system.

01

Introduction to forex: the global marketplace

FOUNDATIONS • MARKET STRUCTURE & POWER

- ♦ What the forex market is
 - ♦ Core principles for consistent trading
 - ♦ Who controls the market: banks, hedge funds, market makers
 - ♦ The power of interbank institutions
-

02

Currency mechanics: the language of the market

FOUNDATIONS • MARKET VOCABULARY

- ♦ Base vs quote currency
 - ♦ Pips, lots, spreads and bid/ask
 - ♦ Order types: market, limit, stop
 - ♦ Slippage, liquidity and volatility
-

03

Market analysis: the institutional trifecta

ANALYSIS • TECHNICAL, FUNDAMENTAL & SENTIMENT

- ♦ Technical analysis: price action and patterns
 - ♦ Fundamental analysis: rates, drivers and news
 - ♦ Sentiment analysis: reading the crowd
 - ♦ **Volume Spread Analysis: the RTC primary lens**
-

— MENTORSHIP CURRICULUM

Modules *04 to 06*

Reading price like a book: candle psychology, market conditions and the institutional blueprint for supply and demand.

04

Candlestick mastery: the language of price

PRICE ACTION · CANDLE PSYCHOLOGY

- ◆ Anatomy of a candle: body, wick and story
 - ◆ Key reversals: engulfing, pin bar, inside bar, doji
 - ◆ The psychology behind the candles
-

05

Market conditions and trends

STRUCTURE · TREND, RANGE & INSTITUTIONAL MAPPING

- ◆ Trend, range and consolidation
 - ◆ Bullish and bearish structure
 - ◆ Impulse and correction phases
 - ◆ Internal and external highs and lows
 - ◆ Pullback vs reversal
 - ◆ BOS and CHoCH: smart money reversals
-

06

Supply and demand: the institutional blueprint

ZONES · ACCUMULATION & DISTRIBUTION

- ◆ Drawing high-probability zones
 - ◆ How institutions accumulate and distribute
 - ◆ Precise entries and tight stops
 - ◆ Mitigation and reaction for timing
-

— MENTORSHIP CURRICULUM

Modules *07 to 09*

Where price becomes fair value, timeframes align, and you begin to read the market like a market maker.

07

Equilibrium: where price is fair

FAIR VALUE • PREMIUM & DISCOUNT

- ♦ Market equilibrium and fair value
 - ♦ Premium vs discount pricing
 - ♦ Entering where smart money enters
 - ♦ Fair value gaps and order flow
-

08

Multi-timeframe confluence

CONFLUENCE • TOP-DOWN ANALYSIS

- ♦ Top-down: monthly to intraday
 - ♦ Building confluence across timeframes
 - ♦ Institutional candles and kill zones
-

09

Advanced institutional concepts

ADVANCED • PRICE DELIVERY, LIQUIDITY & ORDER FLOW

- ♦ Interbank price delivery
 - ♦ Liquidity engineering and trap reversals
 - ♦ Fair value gaps and imbalances
 - ♦ Order, breaker and mitigation blocks
 - ♦ Liquidity sweeps and stop hunts
 - ♦ Optimal trade entry with Fibonacci
-

— MODULE 10 • CAPSTONE

The RTC *Entry Model*

The capstone module, where every concept in RTC comes together into one repeatable, rule-based entry model.

MODULE 10 • PUTTING IT ALL TOGETHER

The strategy

A step-by-step breakdown with real case studies from live market conditions.

Practical implementation

Fundamentals plus technicals, applied to live charts with full risk rules.

Smart money entry model

BOS, order block, FVG, liquidity sweep and OTE, combined into one repeatable entry.

The data edge

Building a plan aligned with institutional price delivery for real confluence.

— AFTER THE MENTORSHIP YOU WILL BE ABLE TO

- ✓ Read market structure and liquidity on any timeframe
- ✓ Confirm or reject a setup with volume
- ✓ Plan entries, stops and targets before you click
- ✓ Size every trade by risk, not by feeling

RAO TRADING CONCEPT

Learn how the banks trade, *not the retail crowd.*

Become the liquidity, not the victim of it.
